Company history/background

We are a profitable kitchen business that has been established since 1962, employing three generations. Our specialty is custom-made kitchens; we advise clients based on the space of their current kitchen. From quotation to installation, we handle everything in-house and monitor every detail meticulously. Service and quality are therefore our top priorities. We have been working primarily with Belgian and German firms for over 50 years.

We install custom-made kitchens and dressing rooms.

Unique selling points

We manage everything in-house

Other

The business is located on a main road with a lot of daily through traffic. There is a large car park at our shop, so there is always space for customers. The shop is approximately 300m² in size. We are selling the business because the current manager is retiring. However, there is the possibility of retaining the current employees. We are still a thriving business, so the order book is still well filled. The intention is that whoever takes over the business can simply continue running it and let it grow further. There is also the possibility to purchase the shop including the residence.
