Company history/background

The business portfolio of a young and ambitious growth company specializing in the sale of biodegradable, recyclable, and reusable food packaging is being offered. The company was founded based on a strong personal conviction and a growing societal demand for more sustainable and circular solutions.

The company experienced a significantly accelerated growth trajectory in 2025, with similar further growth expected in 2026. Given the growing importance of the sector and the nature of its activities, there is also considerable room to further develop its growth potential.

The offered business portfolio represents an attractive opportunity for a strategic player or entrepreneur who wants to build on a sustainable concept with proven traction and strong future prospects.

The business is offered at an asking price of €1,500,000.

The sale of sustainable food packaging:

- Disposable packaging
- Reusable packaging

Unique selling points

Limited entrepreneurial risk:

- Strong brand awareness and presence in a fast-growing, strategic sector;
- Future expected turnover increases (extremely interesting pipeline 2026, which has already been partly confirmed by some major projects);
- Good and fast customer service;
- Recurring and loyal customer base;
- Extensive professional network of customers and suppliers;
- Flexible housing (no real estate);
