Company history/background

The company is a specialised installation business for sustainable energy solutions on Spain's Mediterranean coast. Since its establishment in 2018, the company has grown into an established player in the fields of solar panels, battery storage, heat pumps and energy management.

The team brings more than 20 years of international experience in the solar energy sector. This combination of technical expertise, practical experience and high-quality components forms the foundation for the company's growth and customer satisfaction.

Due to the increasing demand for sustainable energy solutions, the organisation has grown strongly in recent years. From a modern facility in the province of Alicante, the company serves both private and commercial customers along the Spanish coast.

The activities are mainly focused on the coastal regions of the province of Alicante and surrounding areas, with a broad customer base of international homeowners and businesses.

For more than seven years, our company has been active along the Spanish coast, specialising in sustainable energy solutions for private and commercial customers. We design, supply and install solar panels, battery storage systems and heat pumps, with a strong focus on quality, reliability and personal service.

Thanks to our extensive experience and knowledge of the local market, we help customers reduce their energy costs, increase their energy independence and invest in a sustainable future. Our activities extend across large parts of the Spanish coast, where we carry out both residential and commercial projects.

Other

We are looking for a serious buyer or investor who can further expand this growing company and take it to the next level. The company operates in a strong and stable market with excellent growth prospects and a solid foundation for further development.

Our preference is for serious investors or entrepreneurs with sufficient financial resources to complete the acquisition without unnecessary financing issues. We are not looking for speculators or so-called “gold diggers”, but for parties who recognise the value of the company and are willing to invest in a sustainable future.

This business offers a unique opportunity for an investor or entrepreneur who wants to enter a market with proven potential and significant further growth opportunities. Discretion, professionalism and constructive cooperation are central to us throughout the entire acquisition process.
